

## Health Technology Consultant (Clinical Engineering)

### 1. Introduction

REAF is a South African company with a core focus on providing consultancy services to the healthcare sector. The REAF team has extensive experience in strategy and operations relating to Health Technology Management and Healthcare Facility Planning and Development.

REAF Consulting is currently looking for an experienced Clinical Engineer / Technician to join their team as Health Technology Consultant at our **Gauteng offices in Technopark, Centurion.**

### Key Requirements:

The ideal candidate will:

- Have a Tertiary Qualification in Clinical or Biomedical Engineering;
- Have at least 5 years' experience in the industry with a minimum of 3 years' experience as a hospital based clinical engineer/technician;
- Be able to work independently;
- Have project management experience.

### Key Responsibilities:

The successful candidate will have to:

- Manage Hospital based procurement and commissioning projects independently;
- Do audits, acceptance or verification testing on equipment.
- Contribute towards the development of standards and procedures for the management of all projects
- Be able to travel locally and internationally.

REAF Consulting offers a flexible working environment and the ability to grow and develop as part of our dynamic team.

**Applications will close** as soon as the vacancy is filled. Interviews are granted at the sole discretion of the directors.
